Master of International Management

Media and Information Management

Marine Industrial and Mining

NA

Sodium is a chemical element with the symbol Na and atomic number is 11. It is a soft, silvery-white, highly reactive metal. Sodium is an alkali metal, being in group 1 of the periodic table. Its only stable isotope is 23 Na.

It is the area of mathematics and computer science that creates, analyzes, and implements algorithms for obtaining numerical solutions to problems involving continuous variables. Such problems arise throughout the natural sciences, social sciences, engineering, medicine, and business.

Not Applicable N/A > **(Na) - Sodium** > **North America** > **Numerical Analysis** > **Network Address**

It is used to indicate when information in a certain table cell is not provided, either because it does not apply to a particular case in question or because the answer is not available. Such a notation can be used on many different types of forms.

This is a continent entirely within the Northern Hemisphere and almost all within the Western Hemisphere. It can also be described as a northern subcontinent of the America.

It is a key networking technology component that facilitates identifying a network node/device and reaching a device over a network. It has several forms, including the Internet Protocol (IP) address, media access control (MAC) address and host address.

NIA

National Investigation Agency

The National Investigation Agency is India's counter-terrorist task force. The agency is empowered to deal with terror related crimes across states without special permission from the states. The Agency came into existence with the enactment of the National Investigation Agency Act 2008 by the Parliament of India on 31 December 2008, which was passed after the deadly 26/11 terror attack in Mumbai.

Network Interface Adapter

A network interface adapter links an electronic device to a network by providing a two-way communication system for data flow between the device and the network. A network interface adapter requires an Ethernet cable that runs between the adapter and the network's router or hub, or it can be wireless.

NSE

National Stock Exchange

National Stock Exchange of India Limited is the leading stock exchange of India, located in Mumbai, Maharashtra. NSE was established in 1992 as the first dematerialized electronic exchange in the country.

Namespace Extension

Technically, a Windows Shell Namespace Extension is an in-process extension. It means it's one .dll file that is also a COM (Component Object Model) server that is configured in the registry so Explorer can find it and load it in its own address space.

Network Support Engineer

This is an engineering position. The position holder, focuses on the maintenance of an existing corporate network, either as part of the organization's internal IT support team or as technical support staff of a third-party network technology provider.

PIN

It is a numeric or alpha-numeric passcode used in the process of authenticating a user accessing a system. The personal identification number has been the key to flourishing the exchange of private data between different data-processing centers in computer networks for financial institutions, governments, and enterprises.

Personal Identification Number

It is also called as Pin Code which is used to formally sort and deliver the mail. Stick code is a 6-digit code of Post office numbering utilized by Indian post. There are 9 PIN regions in the country. The first 8 are geographical regions and the digit 9 is reserved for the Army Postal Service.

Postal Index Number

It's a unique identifier for a project, composed of the project name and a randomly assigned number. Project number is automatically generated by the server and assigned to the project.

Project Identification Number

QC

Quality Control

It is a process by which entities review the quality of all factors involved in production. ISO 9000 defines quality control as "A part of quality management focused on fulfilling quality requirements".

Quantum Chemistry

It is also called molecular quantum mechanics, it is a branch of chemistry focused on the application of quantum mechanics in physical models and experiments of chemical systems. Understanding electronic structure and molecular dynamics using the Schrödinger equations are central topics in quantum chemistry.

Quarterly cycle

The primary purpose of Quarterly Cycle is to keep an overall track of the project. A Quarterly cycle is like an index to all the weekly cycles happening in the project. A quarterly cycle will also help in eliminating minutes details and will enable us to focus on the critical areas of the project.

SAT

Scholastic Assessment Test

It is the day of the week before Sunday and following Friday, and (together with Sunday) forms part of the weekend.
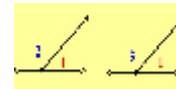

The supplementary angle theorem states that "if two angles are supplementary to the same angle, then they are congruent to each other".

Satellite

State Administrative Tribunal

Saturday

Supplementary Angle Theorem

It is a standardized test widely used for college admissions in the United States. This exam has been developed to evaluate the written, verbal and mathematical skills of the candidates. Applicants aspire to pursue undergraduate courses, particularly in the US and Canada, are required to take the SAT exam.

In the context of spaceflight, a satellite is an object that has been intentionally placed into orbit. These objects are called artificial satellites to distinguish them from natural satellites such as Earth's Moon.

This Tribunal was established in Western Australia in 2005 as an independent body that makes and reviews a range of administrative decisions. Individuals, businesses, public officials and vocational boards can bring before the SAT many different types of applications related to civil, commercial and personal matters.

SIP
